

Titanium Mill Products, Ingot, and Castings

U.S. Department of Commerce
BUREAU OF THE CENSUS

AUGUST 1983

17A991(83)-8
Issued November 1983

The statistics in this publication are based on a survey of manufacturers and represent total U.S. shipments of titanium mill products, ingot, and castings. Estimates are included for companies whose reports were not received in time for tabulation. A description of the survey methodology and related information appears in the January 1983 report for this series, ITA-991(83)-1, issued May 1983.

Table 1. NET SHIPMENTS OF TITANIUM MILL PRODUCTS

(Thousands of pounds)

Product	August 1983	July 1983	August 1982 ¹
Total ²	2,428	2,287	2,342
Sheet and strip	(3)	(3)	(3)
Plate	1,141	992	1,099
Forging and extrusion billet	347	351	322
Rod and bar			30
Fastener stock and wire			
Extrusion	940	944	891
Pipe and tubing			
Other			

¹Data are revised from the annual summary, ITA-991(83)-1, issued September 1983.

²Net shipments is the sum of mill product shipments plus mill products consumed in the manufacture of fabricated products, less total receipts.

³Data for sheet and strip, plate, extrusion (other than tubing), pipe and tubing, and other have been combined to avoid disclosing individual company data.

(X) Not applicable.

¹See table 1 for more detailed data.

²Net shipments is the sum of mill product shipments plus mill products consumed in the manufacture of fabricated products, less total receipts.

³Inventories for the year are those shown for December.

(Z) Less than one-half of 1 percent.

¹ For a comparison of Standard Industrial Classification (SIC) codes, Schedule 8 export numbers, and TSUSA import numbers, see table 4 in the January report ITA-91(83)-1, issued May 1983.

²Source: Bureau of the Census report EM 546, U.S. Exports.

³These values were derived by use of adjustment factors to exclude freight, insurance, and other charges incurred in moving goods to the port of export. This adjustment is made to convert the values to an approximation of the producers' value of exported goods. Current adjustment factors are based on data for 1981 which are published in *Origin of Exports of Manufactured Products*, #81(A8)-5, appendix B. Comparable adjustment factors for earlier years are based on similar factors developed for 1971 and 1972. The current adjustment factor for this report is 0.9731.

⁴Source: Bureau of the Census report IM 145-X, U.S. Imports for Consumption and General Imports.

⁵The value includes c.i.f. (cost, insurance, and freight) at the first port of entry in the United States plus U.S. import duties and other charges to the import point.

⁶Apparent consumption is derived by subtracting exports from the total of net shipments plus imports.

⁷Comparability of output, export, and import classifications for ingot and billet assume that bloom, sheet bar, and slab are reported as ingot or billet in the output numbers. Figures for imports of ingot and billet also include powder, crystal, and similar forms which are excluded from the output and export numbers.

BUREAU OF
THE CENSUS

Topics include:

- ancestry
 - characteristics of persons reporting a single ancestry group
 - characteristics of persons reporting multiple ancestry groups
- nativity
- mother tongue
- current language spoken in the home
- ability to speak English
- ability to read and write any language

Comparability with other data (the 1980 Census and the 1969 Current Population Survey) is discussed. Definitions and explanations are appended.
